26th November 2020

Dear Paul,

Re: 20/02993/TPO - Silverwood Grange And Laggan House Lady Margaret Road Sunningdale

G1 - Various species - fell, G2 - Mixed saplings - fell, G3 - Alders (*Alnus glutinosa*) approx height - 7m prune to achieve 2m clearance from building, G4 - Limes (*Tilia cordata*) - approx height - 8m, location - Neighbour's trees, Crown lift remove overhanging branches to 4m from ground level, T1 - Beech (*Fagus sylvatica purpurea*) - fell, T2 & 3 - Cherry x2 (*Prunus sp*) - fell (TPO 21 of 2003)

Although there are a number of photographs submitted in support of this application it is not possible to accurately ascertain which photograph refers to which tree or trees scheduled for works.

The application also proposes work to 4 separate groups of trees, but no indication is given of the number (and in some cases the species) within each group. This is in marked contrast to the tree information accompanying the 13/03648 application as a condition for redevelopment of the site for 6 apartments and basement parking. This is shown left.

In that application every single tree was individually identified and there appear to be no groups of trees at all. It is unfortunate that this same chart could not have been used in the current application.

In the absence of an arboricultural report the Parish Council have summarised their observations in the chart below and would request that partial refusal is considered by the Tree Team in the absence of more detailed information as specified in the chart.

Tree ID, location	Height	Species	Proposed action	Parish Council Comments
G1, car park	2m	Various	Fell as dead	Agree
G2, side of garage	3m	Mixed saplings	Fell as close to garage	Agree
G3, side of property	7m	Group of Alders	Prune to achieve 2m clearance from building	Agree
G4, neighbour's trees, rear/ side garden	8m	Limes	Crown lift- to 4 metres above ground	No evidence supplied-these are neighbour's trees. Recommend refusal pending further information.
T1, rear garden , right side	10m	Beech	Referred to as 'dismantle'. ie FELL- due to significant dieback	No evidence supplied- no arboricultural report therefore recommend refusal
T2 and T3, rear garden.	8m	Cherry	Fell trees as dead	Agree

Regards

Michael Burn and Yvonne Jacklin
