16 December 2020

Dear Toby

20/03068/TPO Chelsea House Dry Arch Road Sunningdale Ascot SL5 0DD

T1 Scots Pine - fell, T2 Leylandii Cypress - fell, T3 Goat Willow - re-pollard end height 4/5m, T4 Silver Birch - crown reduction end height 6/7m, G1 Poplar trees - reduce by up to 5m to end height 13/14m (TPO 58 of 2003).

The Planning Committee considered this application at its meeting on 15 December 2020 and has a number of concerns related to the precise nature of the work requested.

The application provides a very scant location plan – which identifies only the location and species of the trees intended for felling, pollarding or reduction.

What is less clear is how these trees sit within the context of other TPO trees in this garden. Our confusion can best be demonstrated by looking at the plans provided for this application and the two previous application for tree work on this site:

This is the current application (20/03068) with tree identification:

T1 Scots Pine
T2 Leylandii Cypress
T3 Goat Willow
T4 Silver Birch
G1 Poplar trees

protected by a TPO, please number them as shown in the First Schedule to the TPO where this is available. Use the same numbers on your sketch plan (see guidance notes).
 Please provide the following information below: tree species (and the number used on the sketch plan) and description of works. Where trees are protected by a TPO you must also provide reasons for the work and, where trees are being felled, please give your proposals for planting replacement trees (including quantity, species, position and size) or reasons for not wanting to replant.
 Eg. Oak (T3) - fell because of excessive shading and low amenity value. Replant with 1 standard ash in the same place.

1. 2. 3. Poplars reduce crown by 30%.
 1. - 13. Conifers reduce from 40' to about 20'.

This is the previous application (14/00920) with tree identification:

- 1 Poplar
- 2 Poplar
- 3 Poplar
- 1-13 Conifers

And finally, application (11/03466) with tree identification:

- T1 Salix
- T2 Conifer
- T3 Silver Birch

Given the disparity between these three applications we would urge the Tree Team to conduct a Site Visit to establish what exactly is being requested and to which tree.

Yours sincerely

Yvonne Jacklin and Michael Burn
 Co-Chairs of the Planning Committee
