COMMENTS
Roads in the village
Improve lighting in the alleyway between the London Road car park and Dominoes as well as improve the pavement surface, and signage for the car park. Or have an advertising 'campaign' to improve knowledge of the car park's existence. Many people seem to be unaware of the pathway from car park to Pelican crossing ... get a decent sign saying "shops this way". Have regular community officer checks on parking on Chobham Rd to stop double parking and parking on double yellow outside the bike shop which causes additional issues for traffic at that pinch point
Pot holes
It is almost impossible to walk around sunningdale after dark with lack of street lighting (that could be switched off i.e. midnight to 6am), pavements being uneven & covered in wet leaves for the majority of the winter months.
Better lighting on Broomhall lane on bend by farm and between Station Road and London Rd junctions. Walk way/footpath from station to Dry Arch Road needs improvement- overgrown and fence frequently knocked or fallen over
Could you please consider the installation of an additional lamppost on the junction of Cedar Drive and Broomhall Lane as it's dangerous trying to cross the road when you can't see the kerb.
There is places around Sunningdale that's had poor street lighting, this in turn has lead to a rise in burglaries in Rodgemount. Can a few lights be build from CIL please.
To reduce traffic congestion & improve parking availability. Provide more cycle paths & cycle parking in all shopping & recreational locations. Provide a footpath or other means of a footway under the railway at Dry Arch Road.

**Q2: Physical infrastructure - In your opinion which physical infrastructure improvements are most needed in Sunningdale? Please select one or more areas of physical infrastructure and in the comments box please take time to expand on your answer.**

COMMENTS
The pavement past the farm on Broomhall Lane slopes towards the road! It is incredibly difficult to manoeuvre a buggy safely along there and must be almost impossible to push a wheelchair there. Please would you arrange for a s
More or improved pump stations. Traffic calming in Charters Road before a school child becomes a statistic!
Entry into Larch Avenue since the pavement has been widened means you can no longer turn right with a short view of oncoming traffic. It's a death trap. Silwood Road must be widened and it's junction at the top should be a roundabout. Currently many use the left hand branch intended for those travelling to Ascot, to turn right shortening the queuing time but preventing those correctly queuing from making their turn. RIDICULOUS and once the increased traffic from the new buildings in Larch Avenue are occupied, it's going to be a lot worse. Invest here please
The walk way from the Broomhall Park tennis court car park to the bridge over the stream needs to be repaired, as its now disappeared due to grass infiltration! Also, Sunningdale Station is looking very tired and needs a refurbishment or replacement. It's not a good advert for Sunningdale when visitors arrive!

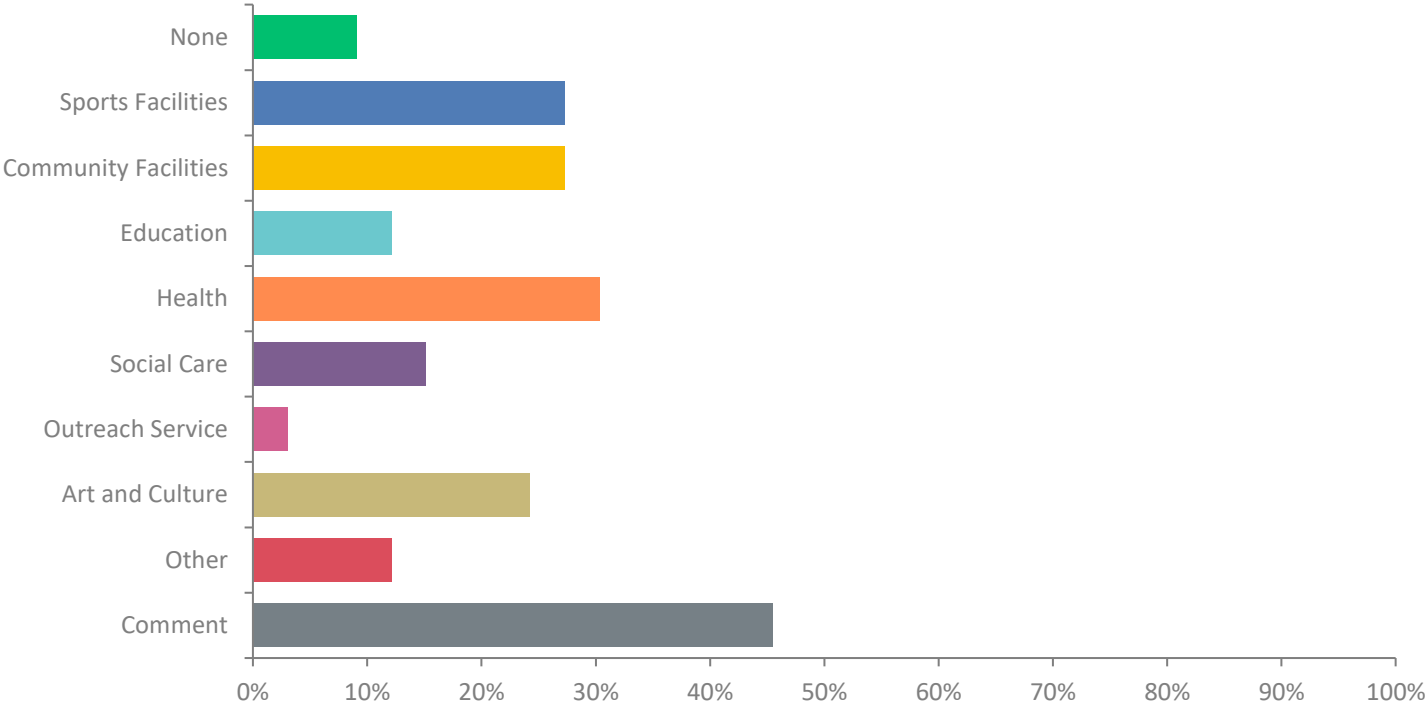

**Q2: Physical infrastructure - In your opinion which physical infrastructure improvements are most needed in Sunningdale? Please select one or more areas of physical infrastructure and in the comments box please take time to expand on your answer.**

COMMENTS
There needs to be protection from increased traffic in small roads due to developments. Over in the Sunningdale Village we residents cannot see how our small roads are expected to cope once nearby new housing is fully occupied. We are already seeing our roads being used for parking for Windsor Park now that there are further restrictions and parking fees there. This increase in outsiders' use is changing the nature of our streets that were until recently quiet and safe. Please consider introducing residents parking off pavements (I add this as its sometimes impossible for disabled people and pushchairs to negotiate pavements in the village).
Please use the money to sweep pavements and roads during autumn. The leaf litter blocks drains and roads flood, and makes pavements impossible to walk along safely.
Stop people parking on verges & paths
Street cleaning especially in the autumn when narrow pavements are covered in wet and slippery leaves, and very dangerous especially for elderly residents.
Roads are not fit for purpose especially near charters school.
More specifically in winter months the pavements need more regular cleaning of leaves and debris especially for the kids and parents walking too and from schools.

**Q3: Social infrastructure - In your opinion which social infrastructure improvements are most needed in Sunningdale? Please select one or more areas of social infrastructure and in the comments box please take time to expand on your answer.**

Comment
Youth and teen facilities
there's already a lot of focus on the recreation area. Is there anywhere for teens to meet?
Swimming pool would be a huge asset
Charters Sports Hall
Build Affordable housing by compulsory purchase & other means necessary.
The pavement past the farm on Broomhall Road slopes towards the road which makes it incredibly difficult to manoeuvre a buggy safely along there and must be almost impossible to push a wheelchair there. Please arrange for remedial work urgently.
A much larger health centre for King's Corner.
Why is the building of the replacement of Magnolia House and Kings Corner surgeries taking so long? Could it be itâ€™s in an unsuitable place? It could have gone into Sunningdale Park if a stronger representation had been applied.
Sunningdale is a great place to live but the sports facilities are poor. We have no public pool/sauna facility and the only affordable gym is at Charters School, which is small, dated and constantly packed at busy times of the day. Egham has just has a brand spanking new leisure centre built - where is the Sunningdale version? I thought Charters was going to get a new leisure centre but no news on that for years now. Has that been scrapped?

Comment
I have lived in the village for 15 years and my initial assigned doctor used to know my family. For the past 10 years I have been assigned a doctor who I have never met and would not recognise. The surgery is a cold and insensitive place to have to visit and I avoid it at all costs. I would like to see compassion return.
Poo bins
fully equipped gym with swimming pool
Art and culture just don't exist in Sunningdale. There seems to be very little social support for people in need.
Empty shops filled with local businesses with affordable rents
Roads, roads, roads. And not the a30

**Q4: Green infrastructure - In your opinion which green infrastructure improvements are most needed in Sunningdale? Please select one or more areas of green infrastructure and in the comments box please take time to expand on your answer.**

Comment
Broomhall Park is lovely but feel we would benefit from more public footpaths through green space
we have so much green belt and parkland around that I dont feel the need of more. Perhaps a few tree plantings in the Bedford Road area, and more daffodils planted down there (not just on Chobham rd).
Natural habitat is being much reduced by the amount of building on green sites and felling of trees
More seating areas at Broomhall Park
The walkway between Sunningdale Station and Dry Arch Road needs more regular cutting back of the trees and undergrowth.
A new football pitch on the sunningdale recreation ground. Local clubs like Berks county are always looking for new grounds to rent.
Protecting & Improving Biodiversity such as working with landowners who have green corridors going through their land with a view to getting these listed as nature reserves. Generally improving all green corridors within the Parish.
The park at Broomhall Lane is great for all ages! Thank you. But a survey done by a professional ecologist would be most interesting. The woodland is one of the few areas of natural woodland left in Sunningdale and must not be damaged or destroyed. Equally the area close to the Parish building at present hidden behind green netting would make a delightful community garden, where people could grow vegetables together and learn about sustainable living.

**Q4: Green infrastructure - In your opinion which green infrastructure improvements are most needed in Sunningdale? Please select one or more areas of green infrastructure and in the comments box please take time to expand on your answer.**

Comment
It is essential to have trees to absorb the co2 we produce.
Car parking is void for Sunningdale Park. So much SANG but so few who can access it. Baloney
Foot path thru the woods
The quality of green infrastructure is generally very good in Sunningdale and we are so lucky to be surrounded by woodlands, countryside etc. Please lets keep it that way.
Why are natural habitats being sold for development? You cannot keep trying to relocate nature and expect it to flourish as it did. We are loosing important historical sites such as Granny Kettle woods and the Devils Highway. Please try to keep some original identity for the town.
More dog poo bins and fines for foulers who don't clean up after their dog
Instead of building on all our green space the PC needs to protect it, especially our trees which are essential for our well being and environmental sustainability.
Better public footpath signs around wentworth golf course

**Q5: Should one of your ideas be suitable to be taken forward by the council, would you be willing to work on a voluntary basis to assist the council to completion? If yes, please enter your email address here**
